

## Parts & Service

Gen South believes that world-class products deserve world-class support. Unlike some companies, we warrant and service the entire power generation package. Some of our offerings include:

- **Maintenance, repair and testing programs**
- **24/7 emergency service, 365 days a year**
- **Extensive parts inventory, with a direct link to the factory for all needs**
- **Scheduled maintenance programs**
- **Warranty support**

Our fleet of service vehicles is centrally dispatched to provide the quickest possible response. Gen South stands behind every installation and our service staff takes pride in exceeding the expectations of our customers. Our service technicians receive ongoing, comprehensive technical training and extensive hands-on experience in the installation, repair and maintenance of the entire power generation package. Gen South also provides technical support for many other major manufacturers.

VISION

**G**en South is Louisiana's exclusive Generac Industrial Central Dealer and the fastest growing Power Generation expert in the territory. With locations now in New Orleans and Baton Rouge, and plans to expand soon into the Shreveport area, we are serious about the Louisiana market from border to border. We also have strategic partners on the North Shore of New Orleans and New Iberia for specifying, service and warranty support. Our factory trained technicians provide skilled diagnostics, preventative maintenance service and complete load bank capabilities. We also have a large inventory of Generac parts at all of our branch locations. No job is too large or difficult for our expertise. We pride ourselves on providing innovative solutions by applying cost effective products and services that fit any situation.

## We Know Standby Power

When it comes to emergency and standby power systems, Gen South is your full 24/7 service provider. We are a proud distributor of Wisconsin based Generac Power Systems which continues to lead the industry in new technology. The professional staff at

Gen South has over 100 years of experience in both the sales and service segments. Our technicians have received Master Certification which is the highest training offered by Generac. We pride ourselves on developing honest business relationships and strive for "Best in Class" services.

**GENSOUTH**

## Power Solutions

Gen South proudly represents Generac Power Systems products. Generac is known for quality, value and innovation with generators ranging from 7 to 6000 kW in a variety of fuel options.

- **QT Series generator** — a highly affordable natural gas or LP vapor solution designed specifically for the commercial market
- **Modular Power System (MPS)** — combines the output of multiple gensets using onboard paralleling technology that eliminates the need for expensive switchgear, yet provides superior redundancy and reliability
- **Gemini® twin genset** — combines two paralleled generators in a single enclosure, providing the lowest cost per kilowatt and highest power density
- **Bi-Fuel™ generator** — provides the ultimate in extended run times by operating on a mixture of up to 90% natural gas and 10% diesel fuel
- **Automatic transfer switches** — a complete line to meet the requirements of virtually any emergency or standby power application

## Disaster Prevention & Recovery Programs

In addition to providing fully integrated power solutions, Gen South offers disaster prevention and recovery programs that include on-site evaluations and rental generators for emergency use. As part of your business continuity planning, consult with us regarding your standby power requirements. We have the resources and the expertise to help you overcome lengthy outages with minimal disruption. This means you can continue business as usual.

## Remote Monitoring & Diagnostics

LAN or internet-based remote monitoring and control systems are also available to keep you connected to your standby power system, no matter where you are located. With this capability, your generator will communicate its status and call for service when needed. The unit's data logging and remote diagnostic capabilities help service technicians to focus on whatever requires their attention, saving time and expense.

## Engineering Capabilities

No two applications are the same. That's why we offer complete design and installation services, as well as custom-designed systems to meet individual requirements. Our staff of knowledgeable and experienced professionals will evaluate your needs and recommend solutions tailored to your specifications.

## Project Management

Gen South not only offers the most comprehensive sales solutions, but we also take pride in our project management capabilities. We will work with you and your design and installation team to ensure a seamless application from product purchase to system commissioning.
